

Complete Safety Solution

Keeping drivers safe on the road

sgfleet

Complete Safety Solution

sgfleet provides a range of solutions that help keep our customers' drivers safe on the road

Enterprise risk assessment

Assessment of employees' driving behaviours and hazard perception skills via a video simulation to help businesses comply with WH&S regulations and reduce spend on corrective measures

Online training

High-level driving skills training via online program with optional on-road practical session to reduce accident risk

In-vehicle training

On-site instructor attendance and training of employees under typical day-to-day driving conditions

4WD driver training

Driving courses, including defensive driving, off-road, heavy vehicle 4WD, and towing

Accessories

Accessories to improve driver safety (e.g. roadside safety kit, first aid kit, dashcam, navigation, reversing cameras and sensors, phone cradles and window tint)

Roadside assistance

24 hours a day, 365 days a year assistance, anywhere in Australia

Accident management

End-to-end management, from initial accident reporting to return of repaired vehicles, reducing repair times and increasing productivity

Telematics

Information on vehicle location, driving routes, speeding, harsh braking, accelerating and cornering, vehicle roll-overs and an optional dash-mounted duress button, alerting pre-designated recipients

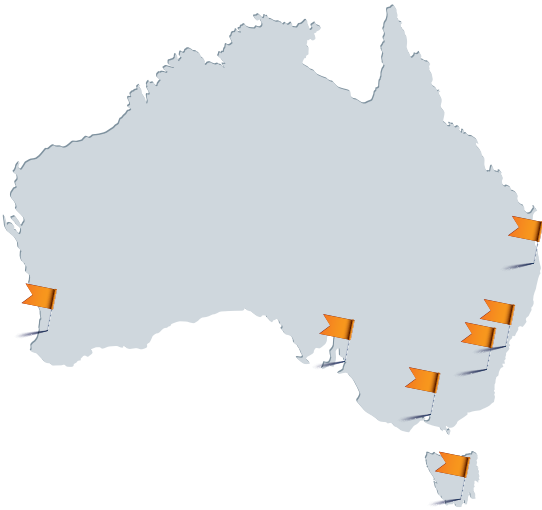

Inspect365

Online system allowing customers to manage safety inspections, report progress and completion of identified action items through integration with repairers (HVNL compliance)
