

# St John Vehicle Safety Kit

Keeping your business compliant with WHS regulations

**sgfleet** has partnered with St John Ambulance Australia to introduce the St John Vehicle Safety Kit, which will help you manage potential risks and hazards that will affect your daily operations on the road.

Most businesses are unaware whether they are compliant with the Work Health and Safety Code of Practice within their vehicles. If you provide your employees with a vehicle, it is your duty to ensure that it is a safe working environment. As cited in Safe Work Australia - First aid in the workplace - Code of Practice 3.1: "All workers must be able to access a first aid kit. This will require at least one first aid kit to be provided at their workplace."

**sgfleet** can assist you by providing the St John Vehicle Safety Kit to keep your business compliant with the WHS Code of Practice.

By choosing to purchase this product, you can feel secure knowing your business is addressing the potential risks that can affect your employees' health and safety whilst on the road.

The St John Vehicle Safety Kit can help in a number of ways:

- **Collision** - a first aid kit is provided to care for anyone injured in the event of a collision
- **Visibility on the road** - if a driver cannot be seen clearly at night or at the scene of an accident, a high visibility vest and safety triangle is provided
- **Low visibility** - a torch is provided in case of reduced visibility conditions
- **Burns/Fire** - a fire blanket and burn treatment equipment is provided in the event of a fire or explosion.

Please see overleaf for a full list of contents.

For more information on the St John Vehicle Safety Kit, call **1300 138 235** or visit [www.sgfleet.com](http://www.sgfleet.com)
